

SOCIAL JUSTICE COLLABORATIVE

Leveraging technology to empower and advocate for immigrants

By investing in high-end software and technical support, SJC developed a virtual work strategy to prioritize both client and staff health and well-being without having to stop or reduce operations.

FOR OUR CLIENTS: To promote a human-centric and seamless transition to virtual workspaces for clients, who have shown little to no resistance to change, SJC gave clients access to tutorials and guidance in their languages. All scheduled virtual meetings include an interpreter as needed and previous training.

FOR OUR TEAM: From HR and project management platforms to regular check-ins, the tools SJC has integrated ensure that our workflow keeps pace with our staff's continued high-quality task completion and time management.

Thanks to the support of our donors and supporters, we continue to advance our mission. By being at the forefront of technology adoption, we commit to serving more clients more effectively, and to building a more inclusive society.
